

PIR sensor

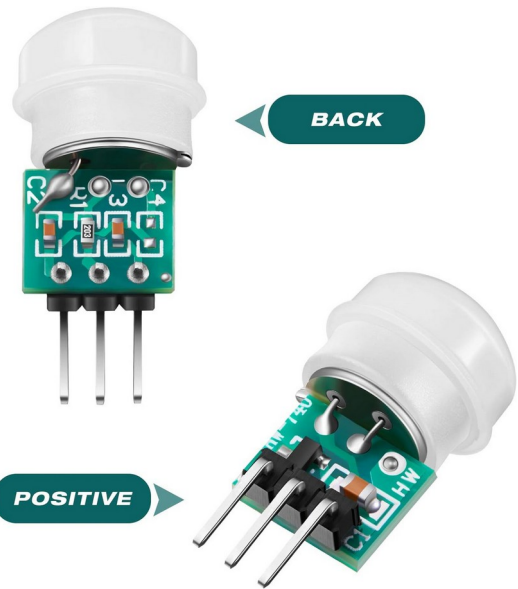

AM312 Mini Human Sensor Module IR Pyroelectric Infrared PIR Motion Sensor Detector Modules
2.7V to 12V, Working Temperature Minus 20 Degrees Celsius to 60 Degrees Celsius

SIZE INFORMATION

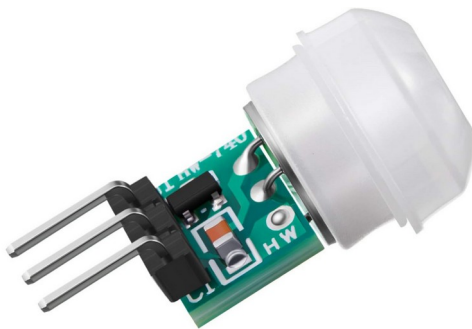

REPEATABLE TRIGGER MODE:

After high sensing output, during the delay time, if a human body is active within its sensing range, its output will keep high until the delay after the people leaves, then it will become low; The human sensor module will prolong a delay time cycle automatically after detecting every activity of the human body, and the time of the next activity is applied as the starting point for the delay time.

PRODUCT SIZE

NOTES:

Please keep away from little kids.
Manual measurement, please allow slight errors on size.
